Strengthen our Voices 2013

Important Notice to the WNUSP movement

WNUSP is an international representative network of the voices of Users and Survivors of Psychiatry. Building on the success of the past decade, WNUSP embarks on a Project to further build our global movement. It is called **Strengthen Our Voices!**

WNUSP has since 2001 internationally challenged the invisibility, discrimination, social isolation and human rights violations of Users and Survivors of psychiatry.

Strengthen our Voices! strives to ensure that the views and opinions of all Users and Survivors of psychiatry are respected and upheld. That our voices are meaningfully included on international platforms.

Most important is that WNUSP hear the voices of our movement.

During the first quarter of 2013, WNUSP will be sending out a questionnaire and asking you, our members of the movement, what your opinions and views are. We need your contact details so that you can participate in this important survey!

WNUSP will be seeking to include your voice in planning the way forward for the following Decades.

If you wish to become a member of WNUSP, please fill in the application on our website www.wnusp.net . If you are unsure about you membership status, please email wgwnusp2013@gmail.com. All Organizations and individual Users and Survivors of psychiatry that identify with the goal of ensuring that our rights and interests are promoted and protected are welcome to apply.
